***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 6, 16, 29-31 are rejected under 35 U.S.C. 102(b) as being anticipated by

Nunomiya et al. (US 6,023,175).

Nunomiya discloses, in Fig. 1, a method or an input buffer circuit comprising:

first (IN) and second (Vref) differential input terminals, the difference between the input signals providing a differential input signal (IN respect to Vref);

a first differential amplifier circuit (IF1) with a first digital I/O standard (LVTTL);

a second differential amplifier circuit (IF2) with a second digital I/O standard (SSTL);

a first set of one or more switch circuits (113) selectively enabling the first differential amplifier circuit in a first input buffer mode (EN and n10 to select LVTTL mode);

a second set of one or more switch circuits (108) selectively enabling the second differential amplifier circuit in a second input buffer mode (EN and n10 to select SSTL mode);

wherein each switch circuit receives a programmable control signal (n10) for selectively enabling the associated differential amplifier circuit.

***Allowable Subject Matter***

Art Unit: 2819

Claims 2-5, 7-15, 17-28 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

*Conclusion*

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
